Plot the top 10 most common job platforms that include the yearly salary data.  
Plot this as a bar graph for the average salary

>\_

Data Analyst

The bar plot illustrates the top 10 job platforms by mean yearly salary, highlighting where job listings with yearly salary data tend to offer the highest average annual salaries. This analysis provides valuable insights for job seekers looking for positions with disclosed yearly salaries, pointing them towards platforms that are associated with higher-paying opportunities.

The visualization indicates a clear ranking of platforms based on the average yearly salary offered in job listings, which can be a critical factor for job seekers making informed decisions about where to focus their job search efforts, especially in fields related to data analysis and related disciplines.
